News and Updates

Ukrproduct will launch dairy farm

According to the official information released by the company, Ukrproduct is planning to launch the first phase of dairy plant by 2015. Company stated that farm will be able to hold 3 500 cows at this stage with further growth of cattle numbers and utilization rare in the future. Company has not clarified whether company will be aiming at milk production, sales of live weight cattle or integrating meat processing in its structure.

AgroInvest comment: *Ukrproduct will continue its growth and development within its strategic development plan. We also believe that Ukrproduct capitalization declined due to these news since meat production, especially beef, as well as milk production indicated significant decrease of profitability.*
